Collage and modelling

Fun activities to try at home

Geography— People and places

As part of this topic children will learn about the UK in relation to the rest of the world and begin to pick out similarities and difference between places.

If you have a tablet/phone, think about downloading 'Where in the world'. Where in the World is a game of geographic knowledge,. It shows you a location on Street View and you have a set time to identify where in the world that place might be. Simply drop a pin on the map to make a guess and you'll get a score based on how close you were to the correct location.

Art

Visit the website below for some fun summer collage activities.

PSHE

As part of our 'shared responsibility unit' the children will be learning about how it is a shared responsibility to protect our environment. To help your children learn about sustainability you could:

- **Re-use old clothes to make a costume.**
- **Go on a 'garbage walk'; walk around your local area and pick up rubbish.**
- **Go for a bike ride.**
